POWER L-GLUTAMINE PRO 100% PURE PHARMACEUTICAL GRADE L-GLUTAMINE- THE HIGHEST QUALITY GLUTAMINE AVAILABLE!

Glutamine is the most common free amino acid in muscle tissue. Intense exercise dramatically increases the need for glutamine. While L-glutamine builds and maintains muscles tissue, it also provides a major source of energy for the entire body and in particular the brain. L-glutamine is essential for numerous functions that are vital to brain metabolism. L-glutamine performs a major role in DNA synthesis and supports the immune system. Glutamine may stimulate the body's natural hormonal responses to reduce muscle soreness. L-glutamine may also curb sugar and alcohol cravings and bolster the nervous system which can help fight depression & fatigue. L-glutamine supports the natural production of growth hormone, which initiates the release of insulin growth factor (IGF-1) which can increase lean muscle mass and bone density while promoting general good health.*
